

MEMORANDUM

KONG Products Lifetime

Kong spa

Owing to the acquired experience from the coming into force of CE norms and on the basis of statistical considerations:

STATES

that lifetime:

- of metallic products is theoretically unlimited
- of textile and plastic products is 10 years since date of production

Therefore, within the relevant period of time, products can be used in safety provide that:

- controls before and after using are carried out by a qualified person;
- recurring controls are carried out and recorded on the control schedule by a technician authorized by the manufacturer;
- no control points out working defects, deformations, wear and deterioration of the fabric or seams. etc....
- are stored cleaned, dry, lubricated in a dry (relative humidity 40-90%), cool (5-40 C temperature) dark (avoid U.V. radiations), chemically neutral (absolutely avoid salted environment) place, far from cutting edges, heat sources, humidity, corrosive substances or other detrimental conditions,
- maintenance is carried out as described on directions;
- are properly used not exceeding $\frac{1}{4}$ of the breaking load, avoiding to leave them in cars with the direct exposure in the sun.

Do not old devices (for instance that are expired, without updated record on the control schedule, not conforming to the current norms, not suitable or not compatible to the current techniques, tec...)

Destroy old, deformed, not properly working devices, in order to prevent any future employ.

This declaration replaces the lifetime of the product reported on the directions that will be updated on the occasion of new reprinting
