

CARABINERS / CONNECTORS

ARGON RF

ALU ALLOY | WIRE GATE | ASYMMETRIC

Carabiner dedicated to those looking for the ultimate in light weight and slightest dimensions. Designed for climbing and the use in the quickdraw. The curved shape allow for a secure hand grip and quick of the rope. The contact surfaces are wider to reduce the wear and tear and the passage of the rope.

The wire gate carabiner allows for a lighter, more fluid and with a longer lifetime than traditional levers.

The reduced weight of the wire gate makes it less prone to the phenomenon of "gate flutter" (very dangerous condition created by impact forces generated by the irregular rope climbing or from contact with hard surfaces during a fall at the moment the lever that opens).

Key Features:

Lightweight

Slim profile for a small footprint.

Lever flush lighter and more durable

Curved shape for a better grip

High quality product completely made in Italy, tested piece by piece.

Recommended for

Sport: Activities

Mountaineering, Climbing
