

## DESCENDERS

### ROBOT

#### CANYONING DESCENDER

The Robot Descender is a multi-purpose device ready to accommodate your climbing needs. Very useful for many other actions as lifting, belaying, rescue etc. You never risk to lose your Robot because you can insert and disconnect the rope without any need of detaching it from your harness. It can accommodate ropes between 8-13 mm in diameter in a single or double configuration.

#### Recommended for

**Sport: Activities**  
Caving, Canyoning
