

ROPE CLAMPS

FUTURA FOOT

NEW

Foot ascender that improves and completes the performance of the Futura Hand ascender and the Futura Body chest rope clamp.

Available in right and left versions, equipped with an anti-torsion stirrup.

Fitted with a hole for inserting a carabiner that locks the cam, preventing accidental release of the rope.

Futura System: it's the natural marriage between three devices, the best support to ascend a rope with the "ROPE WALKING SYSTEM" (as if climbing a ladder).

After testing the system, cavers confirm an excellent performance and a 30%-efficiency's increase during the ascent.

High quality product, made in Italy!
Patented.

Recommended for

Sport: Activities

Caving, Mountaineering, Climbing

Professional: Work activities

Sailboats, Rope Access

Professional: Rescue activities

Mountain rescue, Firebrigades and civil protection, Tactical
