

## BAGS

### BART

Small bag which stabilizes the hook positioned on the helicopter winch during the descent without hanging loads, facilitating the placement at the point where it is the technical crew and the eventual stretcher to retrieve.

Made of ultra-durable PVC.

To be filled with a recommended weight of about 10 kg

Weight not included.

Dimensions: cm 12x12x33

Volume: 3.6 liters

Weight: 160 g
