

AID CLIMBING

BAMBOO

NEW

Telescopic pole with an ingenious hooking system that keeps the connector open.

Once you reach the anchor point, just pull the pole and the connector will release automatically and close again.

At this point a "safety line" was obtained to ascend safely, a ladder, a scaffolding, etc ...

It can also be used for rescue situations (eg: recovering a wounded person in a crevasse).

Equipped with an additional module to increase the maximum length from 265 cm to 350 cm.

Non-slip EVA foam handles.

Recommended for

Sport: Activities

Mountaineering, Climbing

Professional: Work activities

Scaffolding and trestels, Metal structures, Roof and inclined planes, Rope Access, Ladders and elevating platforms

Professional: Rescue activities

Cableway evacuation, Mountain rescue
