

ZAZA ACCESSORIES

ZAZA2 QAS

NEW

Quick attach system.
Easy to install.
For 10 or 13 mm chain.

COUDOU PRO, the revolution of continuous lifelines for adventure parks!

HOW DOES IT WORK?

The principle of operation is very simple: the hook's opening is smaller than the diameter of the cable, but greater than the thickness of the plates. In this way, safety is guaranteed. Once you enter the lifeline, it is impossible to accidentally disconnect before the end of the course. Only by a special key supplied to the manager of the park, it is possible to unlock the sleeve and then make ultra-rapid evacuations in case of illness, storm, fire, etc...

Thanks to the various components, it is possible to secure all steps and the various games of your park, such as rope jumps, with the new ZAZA 2 Connect. Coudou Pro system will allow you to save on surveillance staff costs and ensure better security for your customers.
