SPECIAL FORCES RAPPEL BELT 319CPJ

NEW

Unique new concept for a CQB (Close Quarters Battle) belt system that can easily be converted to a rappel or extraction seat harness. Belt portion of the harness can be worn as a standard CQB belt. The waist belt buckle is located on the left of the center to make it easier to accommodate a drop leg or waist holster on the right side of the waist belt. The leg support portion of the harness is easily attached to the belt with *Cobra Quick Connect* buckles. The leg portion is small enough to be stowed in BDU (Battle Dress Uniform) leg pockets. The harness attachment point is well suited for all rappel and extraction situations.

Quick release *Cobra* waist buckle and *Cobra* Leg Buckles. Available in right or left-hand waist buckle versions. Waist belt portion is now made with "operational camouflage pattern" (OCP) webbing.

Sizes available: M, L
 Colour available: OCP/Terra.
 Meets ASTM F1772 Seat Harness Standards

This device is not suitable for private use, and it is specifically designed for use by the armed forces or in the maintenance of law and order.
