

## HARNESSES

### MIKE

#### UPSIDE DOWN ABSEIL | NARROW SPACES RESCUE

Special harness with ankle supports that allows head-down abseil in narrow spaces and tunnels (wells, silos, etc...).

The high strength tape with strong stitches assures the max safety and reliability.

The ergonomic paddings makes comfortable the overturned position, splitting the user's weight on shoulders, waist and ankles.

Universal size with self-locking buckles easy to adjust.

Accessory: special bag for material and tools to be hanged to shoulder harness.

Conform to EN 1498/C standards.

#### Recommended for

**Professional: Rescue activities**

Firebrigades and civil protection
