

8 - SPECIFIC INFORMATION

The Personal Protective Equipment Category III 272.D00 "RESCUE LANYARD" is:

- a flexible connecting element of a personal protection system without length adjustment device;
- part of a system protecting against impact caused by fall from a height;
- certified according to EN354:2010.

Fig. 1 – Indirect connection – Insert a suitable connector in the loops (A or B) to connect other devices.

Fig. 2 – Lark's foot – The attachment loop (A) is specially designed for connections via lark's foot.

Fig. 3 – Adjustable – The loops (C) can be used to reduce the length of the device.

Fig. 4 – Use as a lanyard – This device can be used also with an energy absorber.

Fig. 5 – Improper and wrong use – Do not connect more than one user to an energy absorber, or more than one energy absorber to one user.

Compatibility – This device has been designed to be used with:

- energy absorbers according to EN355;
- connectors according to EN362 and/or EN12275;
- harnesses according to EN361, EN813, EN1497, EN1498, and/or EN12277.

Check before and after use – Before and after use, make sure that the device is in an efficient condition and that it is working properly, in particular, check that:

- is suitable for the use you intend to make of it;
- has not been mechanically deformed;
- shows no sign of UV contamination, corrosion and oxidation;
- stitching (D and E) are intact and there are no cut or loose threads;
- tape does not have cuts, burns, chemical residues, excessive hair, wear, in particular check the areas in contact with metal components;
- markings are still readable.

Important:

- pay attention when making knots, they reduce this device strength up to 60%;
- the total length of the system including this device connected to an energy absorber according to EN355 (e.g. device + absorber + connectors) shall not exceed 2 m;
- when placing the device, verify that:
 - the anchor point is positioned above the user;
 - the system which this device is part of is always stretched so as to limit any fall.

Warning:

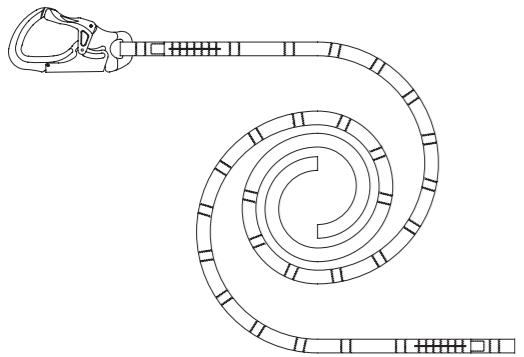

- beware of entrapment;
- stitching (E) can withstand up to 2kN;
- take appropriate measures if the device is used close to sharp edges;
- particular conditions (e.g. heat, cold, humidity, oil, dust) could hinder or affect the performance of this device;
- the potential falling height must always be lower than 0.5 m unless the user is equipped with suitable certified devices (eg. Energy absorbers according to EN355) that protects from dynamic forces exerted on the user during the arrest of a fall.
